INDEX TO VOLUME 91, 1984
THE AMERICAN MATHEMATICAL MONTHLY

Author Index	665	Letters to the Editor	672
Subject Index	667	Photos	672
Index of Special Recurring Topics	670	Miscellanea	672
Rebuses	670	Reviews	673
Problems and Solutions	671	Errata and Addenda	673

AUTHOR INDEX

ALEXANDERSON GL See Klosinski LF

AVIS DAVID The number of furthest neighbour pairs of a finite planar set 417–420

AVITAL SHMUEL AND LIBESKIND SHLOMO An algebraic and geometric approach to two step iteration of bilinear functions 53–56

BALL BJ Arcwise connectedness and the persistence of errors 431–433

BÁRÁNY I, KATCHALSKI M AND PACH JÁNOS Helly's Theorem with volumes 362–365

BARNES CW Euler's constant and e 428–430

BAXLEY JV AND MOORHOUSE JC Lagrange multiplier problems in economics 404–412

BIRMAN GS AND NOMIZU KATSUMI Trigonometry in Lorentzian geometry 543–549

BOOLOS GEORGE The logic of provability 470–480

BOYER RS AND MOORE JS Proof checking the RSA public key encryption algorithm 181–189

BRINN LW Algebraic coding in the undergraduate curriculum 509–513

BROWN TC Poisson approximations and the definition of the Poisson process 116–123

BURCKEL RB Bishop's Stone-Weierstrass theorem 22–32

BURGER WF AND SCHULTZ JE The role of mathematics education specialists in a mathematics department 575–578

BURROWS BL AND TALBOT RF Sums of powers of integers 394–403

CABLE CA The disk and shell method 139

CATER FS A partition of the unit interval 564–566

_____, On van der Waerden's nowhere differentiable function 307–308

_____, Differentiable nowhere analytic functions 618–624

CHANG G-Z Bernstein polynomials via the shifting operator 634–638

CHRISTEN CLAUDE AND HWANG FK Detection of a defective coin with partial weight information 173–179

CROOK JF AND GOOD IJ Is this matrix function unimodal? 560

D'ANGELO JP Mapping theorems in complex analysis 413–414

DIAMOND HARVEY AND GELLÈS GREGORY Relations among some classes of subsets of R 19–22

DIXON JD Factorization and primality tests 333–352

DOWDS RICHARD See Straight HJ

DROBOT VLADIMIR AND SAWKA JOHN Why the product topology? 137–138

EISEMANN KURT Number-theoretic analysis and extensions of the most complicated and fantastic card trick ever invented 284–289

FALK RUMA Multiplicative analogues of some statistics 198–202

FEINTUCH AVRAHAM AND RUBIN MATATYAHU The matrix equation $AX - XB = C$ 506–507

FUSTER R AND MARQUINA A Geometric series in incomplete normed algebras 49–51

GAISSER JW See Minassian DP

GALLIAN JA Another proof that A_5 is simple 134–135

GALLIAN JA AND VAN BUSKIRK JAMES The number of homomorphisms from Z_m into Z_n 196–197

GALVIN WP Matrices with custom-built eigenspaces 308–309

GELLÈS GREGORY See Diamond Harvey

GERBER HU Wronski's formula and the resultant of two polynomials 644–646

GOOD IJ See Crook JF

GREENBERG MJ Note on the Cayley-Hamilton theorem 193–195

GROŠEK OTOKAR How few incomparable cuboids will tile the cube? 624–628

GUINAND AP Euler lines tritangent centers and their triangles 290–300

GUY RK A couple of cubic conundrums 624–629

_____, A pentagonal pot-pourri of perplexing problems primarily probabilistic 559–563

HALMOS PR Backlog and you 333

HENLE JM Tangent planes with infinitesimals 433–435

HENRY MS Approximation by polynomials: interpolation and optimal nodes 497–499

HILLMAN AP See Klosinski LF

HOWE ROGER Correction to "Very basic Lie theory" 247

HWANG FK See Christen Claude

JACKSON BRAD AND RINGEL GERHARD Colorings of circles 42–49

JOHNSON BR An elementary approach for extending Poisson processes to the nonstationary case 646–648

JOHNSON GW An unsymmetric Fubini theorem 131–133

JOHNSON WELLS Power series without Taylor's theorem 367–369

KAI-LAI CHUNG Solve this Catalan type recurrence 559–560
KATCHALSKI M See Bárány I
KLOSINSKI LF, ALEXANDERSON GL AND HILLMAN AP The William Lowell Putnam Mathematical Competition 487–495
KNUTH DE The toilet paper problem 465–470
KOCH RICHARD Matrix invariants 573–575
KUPKA JOSEPH AND PRIKRY KAREL The measurability of uncountable unions 85–97
LAIRD PG AND MCCANN R On some characterizations of polynomials 114–116
LEVASSEUR KM A probabilistic proof of the Weierstrass approximation theorem 249–250
LEWIS RP A combinatorial proof of the triple product identity 420–423
LI HC A generalized problem of least squares 135–137
LIBESKIND SHLOMO See Avital Shmuel
LICKE PM What is the probability of a unique champion? 560–562
MACCLUER CR A simple proof of the fundamental theorem on finite Abelian groups 52
MACDONNELL REV JOSEPH SJ A ruled Moebius band which self intersects in a straight line 125–127
MAEHARA RYUJI The Jordan curve theorem via the Brouwer fixed point theorem 641–643
MAGYAR ZOLTAN A recursion on quadruples 360–362
MARQUINA A See Fuster R
MCCANN R See Laird PG
MILLER TL AND OLIN RF Analytic curves 127–130
MINASSIAN DP AND GAISSER JW A simple Weierstrass function 254–256
MOORE JS See Boyer RS
MOORHOUSE JC See Baxley JV
MORRIS SA An elementary proof that the Hilbert cube is compact 563–564
MYCIELSKI JAN Pursuit and evasion in a circle 415–416
NOMIZU KATSUMI See Birman GS
OLIN RF See Miller TL
PACH JÁNOS See Bárány I
PEČARIĆ JE A simple proof of the Jensen-Steffensen inequality 195–196
PHILLIPS GM Aitken sequences and Fibonacci numbers 354–357
_____, Archimedes and the complex plane 108–114
PIEGORSCH WW Can we generate a bivariate Poisson distribution with a negative correlation? 562
POURAHMADI MOHSEN Taylor expansion of $\exp(\sum_{k=0}^{\infty} a_k z^k)$ and some applications 303–307
PRIKRY KAREL See Kupka Joseph
RICHARDS IM A remark on the number of cyclic subgroups of a finite group 571–572
RINGEL GERHARD See Jackson Brad
RUBIN MATATYAHU See Feintuch Avraham
RUDIN WALTER The inner function problem 301–302
SAARI DG AND URENKO JB Newton's method circle maps and chaotic motion 3–17
SAKAROVITCH JACQUES A problem on rational subsets of the free groups 499–501
SALLEE JF What is the simplexity of the d-cube? 628–629
SAWKA JOHN See Drobot Vladimir
SCHATTSCHNEIDER DORIS The taxicab group 423–428
SCHECHTER MURRAY Summation of divergent series by computer 629–632
SCHERER KARL Some new types of closure properties in the plane 480–487
SCHULTZ JE See Burger WF
SHAPIRO DB A periodicity problem in plane geometry 97–108
SHORTT RM Empirical measures 358–360
SIMOSON ANDREW On two halves being two wholes 190–193
SOLOMON FREDERICK A theorem concerning Lorentz transformations 638–641
SPALTENSTEIN N A family of curves with two equichordal points on a sphere 423
SPIGLER R Double limits and matched asymptotic expansions 501–505
STEINER RICHARD Teaching about the real numbers 202–203
STOB MICHAEL A supplement to "A mathematician's guide to popular sports" 277–282
STRAIGHT HJ AND DOWDS RICHARD An alternate method for finding the partial fraction decomposition of a rational function 365–367
STRANG GILBERT Duality in the classroom 250–254
STRÖEKER RJ How to solve a Diophantine equation: a number theoretic excursion 385–392
TALBOT RF See Burrows BL
TAYLOR AE A life in mathematics remembered 605–618
TER HORST HJ Riemann-Stieltjes and Lebesgue-Stieltjes integrability 551–559
TER MORSCHE HG AND VELTKAMP GW A discrete Landau problem 508–509
THEWS KLAUS What are the size and shape of the largest region that can be guarded against a faster invader? 416
THIEMANN JGF When is there a probability measure on a σ-algebra? 562
TSING N-K Infinite-dimensional Banach spaces must have uncountable basis—an elementary proof 505–506
URENKO JB See Saari DG
VAN BUSKIRK JAMES See Gallian JA
VELTKAMP GW See ter Morsche HG
WAND MITCHELL What is LISP? 32–42
WEIL ANDRÉ Euler 537–542
WILKEN JB Möbius equivalence and Euclidean symmetry 225–247
WOLFRAM STEPHEN Geometry of binomial coefficients 566–571

SUBJECT INDEX

This index uses the current version of AMS 1980 Mathematics Subject Classification.

00-XX GENERAL

–01 Elementary exposition, textbooks RICHARD STEINER 202 BJ BALL 431
A05 General mathematics SHMUEL AVITAL AND SHLOMO LIBESKIND 53
A25 Methodology and philosophy of mathematics WF BURGER AND JE SCHULTZ 575 SHMUEL AVITAL AND SHLOMO LIBESKIND 53

01-XX HISTORY AND BIOGRAPHY

A50 18th century ANDRÉ WEIL 537
A70 Biographies, obituaries, personalia ANDRÉ WEIL 537 AE TAYLOR 605

03-XX MATHEMATICAL LOGIC AND FOUNDATIONS

–01 Elementary exposition, textbooks JOSEPH KUPKA AND KAREL PRIKRY 85
–04 Explicit machine computation and programs (not the theory of computation or programming) RS BOYER AND JS MOORE 181
B35 General logic: Mechanical theorem proving RS BOYER AND JS MOORE 181
B45 General logic: Modal and tense logic, entailment, etc. GEORGE BOOLOS 470
E05 Set theory: Combinatorial set theory JOSEPH KUPKA AND KAREL PRIKRY 85
E55 Set theory: Large cardinals JOSEPH KUPKA AND KAREL PRIKRY 85
F25 Proof theory and constructive mathematics: Relative consistency and interpretations GEORGE BOOLOS 470
F30 Proof theory and constructive mathematics: First-order arithmetic and fragments GEORGE BOOLOS 470

05-XX COMBINATORICS

A15 Classical combinatorial problems: Combinatorial enumeration problems, generating functions DE KNUTH 465
A19 Classical combinatorial problems: Combinatorial identities RK GUY 559
B30 Designs and configurations: Other designs, configurations CLAUDE CHRISTEN AND FK HWANG 173
B45 Designs and configurations: Tessellation and tiling problems RK GUY 624
B99 Designs and configurations STEPHEN WOLFRAM 566
C15 Graph theory: Chromatic theory of graphs and maps BRAD JACKSON AND GERHARD RINGEL 42

10-XX NUMBER THEORY

–02 Advanced exposition (research surveys, monographs, etc.) RJ STROEKER 385
–04 Explicit machine computation and programs (not the theory of computation or programming) JD DIXON 333
A15 Elementary number theory: Power residues, reciprocity KURT EISEMANN 284
A20 Elementary number theory: Number-theoretic functions, related numbers; inversion formulas IM RICHARDS 571
A25 Elementary number theory: Elementary prime number theory, factorization RS BOYER AND JS MOORE 181 JD DIXON 333
A35 Elementary number theory: Recurrence sequences GM PHILLIPS 354
A40 Elementary number theory: Special numbers, sequences and polynomials (e.g. Bernoulli) GM PHILLIPS 354
A99 Elementary number theory RP LEWIS 420
C04 Forms (especially quadratic): Forms over real fields ANDRÉ WEIL 537
C05 Forms (especially quadratic): Quadratic, bilinear and Hermitian forms, general theory ANDRÉ WEIL 537
F35 Diophantine approximation: Irrationality and transcendence DB SHAPIRO 97

13-XX COMMUTATIVE RINGS AND ALGEBRAS

B25 Ring extensions and related topics: Polynomials over commutative rings PG LAIRD AND R MCCANN 114

15-XX LINEAR AND MULTILINEAR ALGEBRA; MATRIX THEORY

–01 Elementary exposition, textbooks AVRAHAM FEINTUCH AND MATATYAHU RUBIN 506
–04 Explicit machine computation and programs (not the theory of computation or programming) WP GALVIN 308
A15 Determinants, permanents, other special matrix functions HU GERBER 644
A18 Eigenvalues, singular values, and eigenvectors WP GALVIN 308 ZOLTAN MAGYAR 360
A21 Canonical forms, reductions, classification RICHARD KOCH 573
A24 Matrix equations and identities MJ GREENBERG 193
A63 Quadratic and bilinear forms, inner products GS BIRMAN AND KATSUMI NOMIZU 543
A90 Applications to physics FREDERICK SOLOMON 638
A99 Miscellaneous topics GILBERT STRANG 250

16-XX ASSOCIATIVE RINGS AND ALGEBRAS

A72 Automorphisms, derivations, other morphisms JA GALLIAN AND JAMES VAN BUSKIRK 196

20-XX GROUP THEORY AND GENERALIZATIONS

B05 Permutation groups: General theory for finite groups JA GALLIAN 134

B35 Permutation groups: Subgroups of symmetric groups ZOLTAN MAGYAR 360

D60 Abstract finite groups: Arithmetic and combinatorial problems IM RICHARDS 571

E05 Structure and classification of infinite or finite groups: Free nonabelian groups JACQUES SAKAROVITCH 499

E34 Structure and classification of infinite or finite groups: General structure theorems CR MACCLUER 52

F10 Special aspects of infinite or finite groups: Word problems, other decision problems, connections with logic and automata JACQUES SAKAROVITCH 499

K30 Abelian groups: Automorphisms, homomorphisms, endomorphisms, etc. JA GALLIAN AND JAMES VAN BUSKIRK 196

22-XX TOPOLOGICAL GROUPS, LIE GROUPS

-01 Elementary exposition, textbooks ROGER HOWE 247

26-XX REAL FUNCTIONS

A03 Functions of one variable: Foundations; limits and generalizations, elementary topology of the line RICHARD STEINER 202

A06 Functions of one variable: One-variable calculus HJ STRAIGHT AND RICHARD DOWDS 365 CA CABLE 139

A18 Functions of one variable: Iteration DG SAARI AND JB URENKO 3

A21 Functions of one variable: Classification of real functions; Baire classification of sets and functions FS CATER 564 HARVEY DIAMOND AND GREGORY GELLES 19

A24 Functions of one variable: Differentiation (functions of one variable); general theory, generalized derivatives, mean-value theorems CW BARNES 428 FS CATER 618

A27 Functions of one variable: Nondifferentiability (nondifferentiable functions, points of nondifferentiability), discontinuous derivatives FS CATER 307 DP MINASSIAN AND JW GAISSER 254

A42 Functions of one variable: Integrals of Riemann, Stieltjes and Lebesgue type HJ TER HORST 551

A51 Functions of one variable: Convexity, generalizations JE PEČARIĆ 195

B05 Functions of several variables: Continuity and differentiation questions JM HENLE 433

B10 Functions of several variables: Implicit function theorems, Jacobians, transformations with several variables JV BAXLEY AND JC MOORHOUSE 404

C15 Polynomials, rational functions: Rational functions HJ STRAIGHT AND RICHARD DOWDS 365

E35 Miscellaneous topics: Nonstandard analysis JM HENLE 433

28-XX MEASURE AND INTEGRATION

-01 Elementary exposition, textbooks JOSEPH KUPKA AND KAREL PRIKRY 85

A05 Classical measure theory: Classes of sets (Borel fields, σ-rings, etc.), measurable sets, Suslin sets, analytic sets HARVEY DIAMOND AND GREGORY GELLES 19

A12 Classical measure theory: Contents, measures, outer measures, capacities ANDREW SIMOSON 190

A20 Classical measure theory: Measurable and nonmeasurable functions, sequences of measurable functions, modes of convergence JOSEPH KUPKA AND KAREL PRIKRY 85

A25 Classical measure theory: Integration with respect to measures and other set functions HJ TER HORST 551

A35 Classical measure theory: Measures and integrals in product spaces GW JOHNSON 131

A51 Classical measure theory: Lifting theory JOSEPH KUPKA AND KAREL PRIKRY 85

A99 Classical measure theory RM SHORTT 358

C15 Measures on spaces with additional structure: Measures on topological spaces (regularity of measures, etc.) JOSEPH KUPKA AND KAREL PRIKRY 85

30-XX FUNCTIONS OF A COMPLEX VARIABLE

B10 Series expansions: Power series (including lacunary series) MOHSEN POURAHMADI 303

C99 Geometric function theory TL MILLER AND RF OLIN 127

32-XX SEVERAL COMPLEX VARIABLES AND ANALYTIC SPACES

A10 Holomorphic functions of several complex variables: Holomorphic functions JP D'ANGELO 413

A40 Holomorphic functions of several complex variables: Boundary behavior WALTER RUDIN 301

F15 Geometric convexity: Pseudoconvex domains JP D'ANGELO 413

H10 Holomorphic mappings: Bergman Kernel function JP D'ANGELO 413

39-XX FINITE DIFFERENCE AND FUNCTIONAL EQUATIONS

A12 Finite differences: Discrete version of topics in analysis HG TER MORSCHE AND GW VELTKAMP 508

40-XX SEQUENCES, SERIES, SUMMABILITY

–01 Elementary exposition, textbooks BL BURROWS AND RF TALBOT 394

A05 Convergence and divergence of infinite limiting processes: Convergence and divergence of series and sequences WELLS JOHNSON 367 GM PHILLIPS 108

41-XX APPROXIMATIONS AND EXPANSIONS

A05 Interpolation MS HENRY 497

A10 Approximation by polynomials MS HENRY 497 KM LEVASSEUR 249

A30 Approximation by other special function classes RB BURCKEL 22

A50 Best approximation (Čebyšev, etc.) MS HENRY 497

A60 Asymptotic approximations, asymptotic expansions (steepest descent, etc.) BL BURROWS AND RF TALBOT 394 DE KNUTH 465 R SPIGLER 501

46-XX FUNCTIONAL ANALYSIS

B15 Normed linear spaces and Banach spaces: Summability and bases N-K TSING 505

E40 Linear function spaces and their duals: Spaces of vector- and operator-values functions RB BURCKEL 22

H05 Topological algebras, normed rings and algebras, Banach algebras: General theory R FUSTER AND A MARQUINA 49

J10 Commutative Banach algebras and commutative topological algebras: Banach algebras of continuous functions, function algebras RB BURCKEL 22

51-XX GEOMETRY

B20 Nonlinear incidence geometry: Minkowski geometries GS BIRMAN AND KATSUMI NOMIZU 543

F99 Metric geometry DORIS SCHATTSCHNEIDER 423

M05 Real and complex geometry: Euclidean geometries DB SHAPIRO 97 AP GUINAND 290

M10 Real and complex geometry: Hyperbolic and elliptic geometries N SPALTENSTEIN 423

M99 Real and complex geometry JB WILKER 225

N20 Analytic and descriptive geometry: Euclidean analytic geometry KARL SCHERER 480 JOSEPH MACDONNELL 125

N25 Analytic and descriptive geometry: Analytic geometry with other transformation groups GS BIRMAN AND KATSUMI NOMIZU 543

52-XX CONVEX SETS AND RELATED GEOMETRIC TOPICS

A10 Convex sets in 2 dimensions KARL SCHERER 480

A20 Convex sets in n dimensions I BÁRÁNY, M KATCHALSKI AND JÁNOS PACH 362

A40 Inequalities and extremum problems DAVID AVIS 417

A45 Packing, covering, tiling RK GUY 624

53-XX DIFFERENTIAL GEOMETRY

C50 Global differential geometry: Lorentz manifolds, manifolds with indefinite metrics GS BIRMAN AND KATSUMI NOMIZU 543

54-XX GENERAL TOPOLOGY

–01 Elementary exposition, textbooks SA MORRIS 563

A10 Generalities: Change of topology, comparison of topologies VLADIMIR DROBOT AND JOHN SAWKA 137

B10 Basic constructions: Product spaces VLADIMIR DROBOT AND JOHN SAWKA 137

F25 Special properties: Peano spaces and generalizations BJ BALL 431

H05 Connections with other structures, applications: Descriptive set theory (topological aspects of Borel, analytic, projective, etc. sets) HARVEY DIAMOND AND GREGORY GELLES 19

55-XX ALGEBRAIC TOPOLOGY

M20 Classical topics: Fixed points and coincidences RYUJI MAEHARA 641

58-XX GLOBAL ANALYSIS, ANALYSIS ON MANIFOLDS

F13 Ordinary differential equations on manifolds; dynamical systems: Strange attractors DG SAARI AND JB URENKO 3

60-XX PROBABILITY THEORY AND STOCHASTIC PROCESSES

–01 Elementary exposition, textbooks BR JOHNSON 646

B11 Probability theory on algebraic and topological structures: Probability theory on linear topological spaces RK GUY 559

C05 Combinatorial probability RK GUY 559

E05 Distribution theory: Distributions, general theory RK GUY 559

E15 Distribution theory: Inequalities (Čebyšev, Kolmogorov, etc.) TC BROWN 116

F05 Limit theorems: Central limit and other weak theorems RM SHORTT 358

G17 Stochastic processes: Sample path properties TC BROWN 116

G55 Stochastic processes: Point processes TC BROWN 116
G57 Stochastic processes: Random measures RM SHORTT 358
J15 Markov processes: Random walk RK GUY 559
K30 Special processes: Applications (congestion, allocation, storage, traffic, etc.) DE KNUTH 465

62-XX STATISTICS

–01 Elementary exposition, textbooks RUMA FALK 198
A99 Foundations RUMA FALK 198
H17 Multivariate analysis: Contingency RK GUY 559
H99 Multivariate analysis HC LI 135
J15 Regression and correlation: Paired and multiple comparisons MICHAEL STOB 277
J99 Regression and correlation HC LI 135

65-XX NUMERICAL ANALYSIS

B99 Acceleration of convergence GM PHILLIPS 354
D05 Numerical approximations: Interpolation G-Z CHANG 634
G05 Error analysis: Roundoff error MURRAY SCHECHTER 629

68-XX COMPUTER SCIENCE (including AUTOMATA)

–01 Elementary exposition, textbooks MITCHELL WAND 32
B05 Software: General theory of programming MITCHELL WAND 32
C20 Metatheory (excluding automata): Symbolic computation RS BOYER AND JS MOORE 181
C25 Metatheory (excluding automata): Computational complexity and efficiency of algorithms JD DIXON 333
D20 Automata: Tesselation automata, iterative arrays, cellular structure STEPHEN WOLFRAM 566
F05 Linguistics: Formal languages, grammars JACQUES SAKAROVITCH 499
G15 Artificial intelligence: Theorem proving RS BOYER AND JS MOORE 181

83-XX RELATIVITY

A05 Special relativity GS BIRMAN AND KATSUMI NOMIZU 543

90-XX ECONOMICS, OPERATIONS RESEARCH, PROGRAMMING, GAMES

A10 Mathematical economics: Utility theory JV BAXLEY AND JC MOORHOUSE 404
B40 Operations research and management science: Search theory CLAUDE CHRISTEN AND FK HWANG 173
D26 Game theory: Pursuit and evasion games JAN MYCIELSKI 415 KLAUS THEWS 416
D99 Game theory KURT EISEMANN 284

94-XX INFORMATION AND COMMUNICATION, CIRCUITS

B05 Algebraic theory of error-correcting codes: Linear codes, general LW BRINN 509
B15 Algebraic theory of error-correcting codes: Cyclic codes LW BRINN 509
B45 Algebraic theory of error-correcting codes: Prefix, length-variable, comma-free codes LW BRINN 509
B60 Algebraic theory of error-correcting codes: Other types of codes LW BRINN 509
